DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 11-12, 16-18, 21-23, 33-45, 48-49, 60, drawn to creating a spreadsheet having network-based functionality, classified in class 715, subclass 503.
 - II. Claims 6-10, 13-15, 19-20, 24, 46-47, 50-56, drawn to encrypting and decrypting data, classified in class 380, subclass 255.
 - III. Claims 25-32, 57-59, 163-191, drawn to transmitting data over the network, classified in class 709, subclass 232.
 - IV. Claims 63-68, 72-73, drawn to augmenting a productivity application, classified in class 709, subclass 233.
 - V. Claims 61-62, 89-100, drawn to a network productivity application, classified in class 709, subclass 223.
 - VI. Claims 69-71, 136-149, drawn to authentication, classified in class 713, subclass 168.
 - VII. Claims 74-88, drawn to creating a network-based object, classified in class 709, subclass 220.
 - VIII. Claims 101-135, drawn to accessing network-based content within a spreadsheet from a network, classified in class 709, subclass 217.

- IX. Claims 150-162, drawn to populating a cell in spreadsheet, classified in class 715, subclass 504.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II to IX are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because creating a spreadsheet having network-based functionality does not require transmitting said spreadsheet over the network, authentication, accessing the network-based services, encrypting and decrypting data in spreadsheet, or populating cells in a spreadsheet.

The subcombination has separate utility such as authenticating, encrypting and decrypting, transmitting spreadsheet over the network, populating data in the cells of a spreadsheet.

3. Inventions I and II to IX are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as network-based and spreadsheet and the other inventions have separate utility such as transmitting spreadsheet over the network, authentication, encrypting and decrypting, populating data in cells of a spreadsheet. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II to IX, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

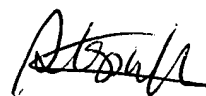

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cong-Lac Huynh whose telephone number is 571-272-4125. The examiner can normally be reached on Mon-Fri (8:30-6:00).
